

Why Failure & Fast Iteration Matters

#EFFounderSchool

David Mack
Co-Founder & CTO at SketchDeck
YC W2014

Hear From a YC Alum on why Failure and Fast Iteration Matters.

Have you thought about building your own tech startup but worried about failing?

David Mack, Co-Founder and CTO at Y Combinator-backed company SketchDeck, will be speaking exclusively to EF Founder School members about the lessons learnt from the failed ideas he's tested, and why fast iteration and accepting failure is important for any founder.

Take a well-earned break from revision and join us on Thursday 22nd May, at 6pm to hear from David. Stick around after the talk for drinks and the opportunity to talk to the EF team about what you should be doing this summer to get your startup ideas off the ground.

N.B. we have an extremely limited amount of tickets for this event so RSVP soon to secure your place.

Thursday 22nd May, 6-8pm

**EF HQ, Club Workspace, The Leathermarket, Weston
Street, SE1 3ER**

(nearest tube station is London Bridge).
