

## Software Development Engineer Intern IMDb - Bristol

IMDb is one of the largest and most popular sites on the web, used by millions of people every day. We have a vast data set, tonnes of passionate users and are constantly improving the experience on our site.

We are looking for outstanding candidates for 3 month internships as Software Development Engineers in 2015, helping us build the next generation of our data management systems.

We're looking for people excited and knowledgeable about developing on the web, managing large data sets, expert systems and machine learning. We hire engineers with a passion for architecting, building, testing and maintaining robust, scalable systems, and who enjoy working on the entire stack, from front to back.

### Basic Qualifications

- On-track for a 2.1 degree in Computer Science or in postgraduate study
- Strong computer Science fundamentals in object-oriented design
- Strong computer Science fundamentals in data structures
- Strong computer Science fundamentals in algorithm design, problem solving, and complexity analysis
- Proficiency in, at least, one modern programming language such as Java, C, C++, C# or Perl

### Preferred Qualifications

- Work experience in software development
- Experience taking a leading role in building complex software systems that have been successfully delivered to customers
- Knowledge of professional software engineering practices & best practices for the full software development life cycle, including coding standards, code reviews, source control management, build processes, testing, and operations

In return, we offer a highly competitive salary, and other excellent benefits including healthcare.
